PARROT DISKETTES

Parrot, the only British manufacturer of diskettes, operates from a 62,000 sq ft purpose built plant located at Cwmbran, South Wales. This plant has been designed for the fully integrated manufacture of 8", 5.25" and 3.5" diskettes.

Parrot is entirely British based, financed and controlled, with technology probably more advanced than any other diskette producer.

Manufacturing everything under one roof, from coating to formatting and duplicating gives us total control over quality. Even our envelopes and library box are made in Britain.

Every single diskette is quality checked at every single stage of production to ensure that:

- ★ All Parrot diskettes are guaranteed error free.
- ★ The components that the disks are made from are totally compatible and consistently of the highest standard.
- ★ Parrot's special jacket liner keeps the disk surface spotlessly clean and the 10ml jacket thickness gives an even head-to-disk contact and makes the disk much harder wearing.
- ★ Parrot's virtually indestructable dust resistant envelopes generate no debris and the ten-disk plastic library box makes filing and retrieval easy.
- ★ All Parrot diskettes come with a lifetime warranty.

So you get years of trouble free usage from every Parrot diskette.
